

## NEXRAD (Next Generation Radar) in the Cockpit

How old is the information on your in-cockpit weather display? The picture you see may represent conditions up to 15 or 20 minutes older than the age indication in the cockpit. The NTSB warns pilots that failing to account for the delay could have deadly consequences. We will use a video presentation of a scenario to spark a conversation on in-flight decision making. Don't miss this exclusive event. Click the link below and register TODAY.

**Directions:** The seminar will be held in the conference room below the restaurant.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
